Sr. Systems Administrator | nLIGHT

Cover letter

Hi nLIGHT team,

Your Longmont role calls for someone who can keep the infrastructure running, handle the escalations and improve the systems behind it. That’s the work I did at FRII.

I was a lead engineer through a company purchase, then became the sole systems engineer for about a year, on call for issues the NOC couldn’t resolve. I ran the SOC 1 and SOC 2 audits, migrated systems to Kubernetes, and owned monitoring, recovery verification and operational documentation.

For Excell, I rebuilt servers and networking and connected a satellite location with VPN, Windows Server and Active Directory. I’d bring that same hands-on ownership to nLIGHT: incident support, practical automation and systems that are easier to operate.

I’m in Loveland. Let’s talk.

Chad
